PRE-PROJECT QUESTIONNAIRE

1. How would you describe your security requirements and threat scenario (i.e what you are trying to guard against?) This can range from opportunistic crime to direct personal threat / kidnapping for reasons relating to your work, profile, or political/religious affiliations.

2. What are the dimensions of the rough wall opening and wall thickness?

3. What is the desired finish of the door/window? Is it a custom wood finish or is it painted? Would you be able to provide a sample for us to match?

4. What type of access control are you looking for? We offer a mechanical multi-point lock that requires a key, or a motorized lock that can integrate with biometric scanners, remote control openers, and keypads.

5. What is the location of the door? Is it external/exposed to weather such as a front entry door or internal such as a bedroom door?

6. What address or zip code would this be shipped to? This will help us provide an accurate shipping quote.

7. What is your target budget? Knowing your budget will help us propose options and features that best suit your needs.
