Who are we?

Shield Security Doors are the industry leader in the manufacturing of armored doors. We combine modern technology with the best materials available for our security products.

With an unmatched range of doors, we combine excellence in manufacturing with attention to detail. Even our lower priced products provide a safety and security level that is the envy of our competitors. We are proud to guarantee every door we make.

Our custom security doors are designed to your exact specifications. We test them not only for forced entry resistance, but also for bullet resistance, fire, sound and thermal transmitence.

When you buy a Shield product you’ll receive not only the highest professional service, but also the most secure doors in the world.
One of our core beliefs is that the secret to good security is to keep it a secret. That's because security is much harder to defeat when you can't see it and don't know what you're up against. Our custom made high-security doors and windows can be designed to look like just about anything you need, including unique wood stains, 3D millings, and custom shaped glass. We'll ensure that the only person who knows you've got a high-security door is... you.
Shield Security Doors have a heart of steel and will stop the most determined intruders, but that doesn’t mean they lack style.
A great benefit to our door’s is that they can be installed by any licensed general contractor!
OUR VAST RANGE OF STYLISH DOORS IS SUFFICIENT TO GRACE ANY HOME IN ANY ARCHITECTURAL OR PERIOD STYLE.
BEAUTIFULLY DESIGNED AND BUILT TO YOUR EXACT SPECIFICATIONS.
IN THE US, THERE IS A HOUSEHOLD BURGLARY EVERY 8.4 SECONDS. DON'T BECOME ANOTHER STATISTIC - PROTECT YOUR HOME AND FAMILY WITH SHIELD SECURITY DOORS AND WINDOWS.

SHIELD SECURITY DOORS

SHIELD SECURITY DOORS
A Shield Security Door is certainly stylish to behold, but beneath the attractive exterior lies a formidable barrier.

KEY SECURITY FEATURES

- Individually formed frames with stainless steel thresholds
- Triple-hinges with chrome-plated finishing caps
- Drill resistant manganese plates to protect the locks
- Eight 3/4” hinge side studs
- Specially formed steel door leaf
- Durable internal and external finishing panels
- Double insulation seals
- Motorized locking system
- Biometrics
- Lockout
- And more ...
Shield will design and build security doors to your exact specifications, even from your own designs if you wish.

Be it a heritage replica or a bespoke design, we use state-of-the-art 3D design and AutoCAD technology to turn your drawings into reality. We then bring your design to life within our high-technology manufacturing plant.

All shapes and designs are manufactured to exacting standards. You don't compromise on style; we never compromise on quality or security.

REPLICA DOORS FOR HISTORICALLY PROTECTED BUILDINGS
Just a note to say how pleased we are with the new front door. The product meets our security needs and looks excellent.”

- Graham and Gill

“After the existing door was smashed to pieces by burglars, Shield set to replicate this beautiful door. Accurate measurements, photographs of neighbouring premises and physical samples of the old door were used to engineer an exact replica.
Just a few lines to tell you that we are delighted with our new Shield Security door. It is a supreme quality door which now makes our home feel like a fortress.”

- Ismael, London
Whether for your condo, bedroom or saferoom door, we can match the other existing doors in your home to ensure that your security is as discreet as you need it to be.

CASE STUDIES: BEDROOM DOORS

Why the most important door in your room is your bedroom door.

• Overnight home invasion: should your home alarm go off at night, a locked bedroom door buys you additional time by sealing you in a secure environment. This allows you time to assess the situation, call the police, and retrieve a weapon without having to worry about your immediate safety.

• Safe room: your bedroom is an instinctive place to seek refuge, night or day. Protecting it with a high-security door ensures that your instincts take you to the safest room in your home.

• Travel: a bedroom is a great place to store valuables when you and your family are on the road. Even if someone breaks in, your valued possessions will remain out of reach.
Our doors are not only strong and stylish, but can also match traditional designs to make sure that your house looks like a home, not a fortress.
A safe room or panic room is a fortified room that is installed in a private residence or business to provide a safe shelter, or hiding place, for the inhabitants in the event of a break in, home invasion, tornado, terror attack, or other threat.

Popularized in the 2002 blockbuster “Panic Room,” the concept of a safe room can be traced back to the “castle keep” of the Middle Ages, an area of the castle designed to keep a king safe during a siege. Major advances in the materials and technology available for building safe rooms makes these spaces more secure and discrete than ever before. You can easily find yourself in a safe room without realizing the walls and floor are reinforced. A custom made Shield door is ideally suited for a safe room, helping ensure that the only person who knows about it is you.
Along with our range of security doors, Shield designs and manufactures custom security windows such as our patented ballistic single-hung window, the only functional ballistic hung window on the market. Your home is only as secure as its weakest link, so we’ve expanded our product line to ensure that every point of entry is as safe and secure as a Shield Security door.

Every Shield window comes with an integrated multi-point locking system and when it comes to installation, we use the same heavy duty framing technology from our doors. We offer a range of security glass options from sledgehammer resistant P6B glass all the way to FB6 glass that will stop a round from an AK-47 or an M16 rifle. Every piece of glass is custom baked, allowing us to create unique shapes that suit your home and ensure you never have to compromise on security or style.
Shield has a reputation for building some of the most beautiful and efficient security doors in the world. Our clients include celebrities, professional athletes, oil sheikhs and Embassies, who trust us to help protect the things most dear to them. They know our combination of strength and cutting edge design will be the perfect fit for their homes and businesses.
The Shield Fortress series was tested at the renowned IFT Rosenheim laboratory and awarded a resistance class 4 rating (EN 1627). It can be upgraded to include ballistic resistance ranging from small caliber handguns to a ceramic self-healing system.
TECHNICAL SPECS

• Door and frame constructed from 16 gauge galvanized steel
• Armored multi-point locking system with up to 20 locking points ¾” Ø
• Locks encased in drill resistant manganese
• Door thickness: 3.5” (91mm)
• Frame thickness: 4.5” (115mm)
• Handgun or rifle (ceramic self-healing) ballistic resistance - optional
• Two hour fire rating – optional
• Welded, adjustable ball bearing security hinges
• ½” (12mm) thick decorative panels
• 2” of rock wool for sound and thermal insulation
• Door is pre-hung to the frame
• L-shaped frame profile
• Frame is secured in the wall using 16 bolts protected by 1” steel shims.
• Unlimited design and glass options

INSTALLATION FAQ

• The Shield Fortress series comes as a pre-hung door set and includes frame, locks, cylinders, handles, hinges, and hardware.
• It can be installed by any licensed GC or door installer.
• No specialized training or tools required!
• A 1/2” to 3/4” gap is required on all sides between the frame and wall (rough opening).
• The Fortress series frame is designed to adapt to crooked walls and openings.
• For detailed instructions: download our installation manual.

DIMENSIONS

• Height: up to 110” (depending on decorative panels)
• Width: up to 49”
• Inswing or outswing

HARDWARE

• High security bump and pick resistant Mul-T-Lock cylinders
• Drill resistant cylinder defenders
• Available lock options: Mottura 85 series (mechanical) or Fiam X1R (motorized)
• Lockout function – optional with mechanical lock only
The Shield Embassy series is designed to help create a secure environment for locations with elevated threat profiles or security challenges. Its 3-inch thick door leaf, patented design, and unique security features are the result of years of research, development, and testing against a wide variety of burglary methods. It was tested at the renowned IFT Rosenheim laboratory and awarded a resistance Class 3 rating (EN 1627).
TECHNICAL SPECS
• Door constructed from 22 gauge galvanized steel
• Frame constructed from 16 gauge galvanized steel
• Armored multi-point locking system with up to 20 locking points ¾” Ø
• Lock encased in drill resistant manganese
• Door thickness: 3” (75mm)
• Frame thickness: 4” (100mm)
• 30 minute fire rating - optional
• Welded, adjustable ball bearing security hinges
• ¼” (12mm) thick decorative panels
• 2” of rock wool for sound and thermal insulation
• Door is pre-hung to the frame
• L-shaped frame profile that protects locking
• Frame is secured in the wall using 16 bolts protected by 1” steel shims
• Inswing or outswing
• Unlimited design and glass options

LOCKS
**MUL-T-LOCK Interactive**

Mul-T-Lock’s patented Interactive platform combines, amongst other features, a special telescopic pin tumbler, a three dimensional sheer line, enhanced drill resistance, and key duplication control. This highly bump and pick resistant cylinder meets the requirements of some of the most stringent American standards.

**Mechanical Lock MOTTURA 85 Series**

The Mottura 85771 multi-point lock is the premier armored mechanical lock on the market. Protected behind a drill resistant manganese plate and by an automatic lockout system in the event the cylinder is attacked, the 85 series is ideal solution for customers looking for a low-tech, high-security locking option.

**eKEY Finger Scanner**

Fingerprint scanners offer the ultimate in biometric security. They are convenient, affordable, safe and reliable. The scanner analyses each fingerprint swipe to provide a unique thermal signature and a special code to open the door. Up to 99 different fingerprints can be stored, and adding or removing authorized fingerprints is easy.

**Motorized Lock FIAM X1R**

The Fiam X1R motorized locking system is the most sophisticated and secure electronic lock on the market. Locking in three directions with up to 20 bolts, the X1R can be integrated with keypads, biometrics, card readers, or any other access control system. Never again will you ask yourself “did I lock the door?” because the X1R ensures that your door is always secured.
